

CONFIDENTIAL

Siemens & Halske A.G. Department South and West Details of
Factories and specifications of work

<u>Factory</u>	<u>Work to date</u>	<u>Proposed Future Work</u>
1. Asch	Measurement apparatus Reccision variable condensers	- -
2. Arnstadt	Radio locators and radio receivers. Resistances Transmitters without variable condensers Soldering Irons Welders Transformers and chokes	Radio receivers Resistances Soldering Irons Welders Transformers and choke tubes
3. Aussig	Loaded coils, and dust core coils Transformers & chokes Toroidal transformers	- - -
4. Balingen	Relay for telegraphy Variable wire resistances	Relay for telegraphy Variable wire resistances Relay Interrupters Light call material (Light signalling material)
5. Bocholt	Screw standard types Dept. with automatic lathes Dept. for winding transformers and coils and wire resistances Department for cabling Repeater for audio frequencies	Screw standard types Dept. with automatic lathes Dept. for wing transformer and coils and wire resistances Dept. for cabling Repeater for audio frequencies
6. Braunschweig	Electric fuses for railways (Alarm fuses) Wrought iron parts	Electric fuses for railways (Alarm fuses) Electric measuring instruments
7. Bruchel	Electric alarm fuses for railways Mechanical alarm fuses for railways Stop-arms for mvy (Sperrwaffen) Wrought iron parts	Electric alarm fuses for railways Mechanical alarm fuses for railways -
8. Erlangen	Electro medical apparatus Wireless apparatus	Electro-medical apparatus Calorific meas. sets Water meter, Oscillographs Cardigraphs, Amperemeter Voltmeter, Meas. Apparatus for testing materials.
9. Chemnitz	Plugs for meas. instruments Multipurpose instruments	- -
10. Fleissen	Special wireless transmitters and receivers Calorific-Instruments	- -
11. Geratitz	Dust cores, Dust core coils Transformers and chokes Resistances	Same as work to date Same as work to date Same as work to date
12. Gera	Condensers of all types	All condensers
13. Greiz	Wire resistances Paper condensers	Wire resistances Paper condensers
14. Rudolstadt	X-Ray tubes and screens Tubes for electro medical purposes Tubes for repeaters in long distance traffic Vacuum fuses	Same as work to date Same as work to date Same as work to date Same as work to date

<u>Factory</u>	<u>Work to date</u>	<u>Proposed Future work</u>
15 Spreyer	Strip of fuses, laminated fuses strips for distribution, strips for lamps, sockets for lamps, strips of keys, press buttons, jacks, interruption keys, plugs answering sets	Same as work to date
16 Zwonitz	Oscillographs Radio locators	-
17 Munchen	Telephone stations Waterproof telephone Galvanoskop shunts Number switch machine Row-Machine K.12 Mix apparatus IMK. 12 Damping gyro Visible signals Standard signalling Signal reg. 2 Back signal rb 1 Direction finding (Wireless beacon apparatus) Fire Switch Carrier telegraphy T.34 Measuring apparatus	Telephone stations of all sorts Waterproof telephone Galvanoskop shunts Number switch answering machine Relays Rotary line switch switchboards and exchanges Automatic exchanges for post office and railway carrier telegraphy WT 34 Telegraphy exchange Telephone repeater (all repeater) Two channel carrier system 12 channel carrier system Precision variable condensers Special elements for repeaters and carrier systems Amperometer, Voltmeter Switch boards Measurement apparatus for electrical communication.
