INTERPRETATION REPORT NO. G. 308.

Photographs taken on 20.6.42.

SORTIE: A/945.

Contact Scale: 1/21,200 (F.L. 20")

LOCALITY: DESVRES.

1. W/T STATION: LE BOIS JULIEN.

(i) Map Reference: - (a) Pinpoint

50° 38' 27" N.
1° 48' 57" E.

(b) Series: 4040 Sheet 49.

Grid Ref: 812433.

(ii) Position: - ¼ m. N. of the small village of LE BOIS JULIEN, and 2 m. S.W. of DESVRES. Situated on the summit of high ground, with no other high ground between it and the Channel, except Mt. VIOLETTE, 5½ m. to the W.S.W. (Photo No. 1.57).

(iii) Description: -

(a) Station consists of a group of huts; the two biggest of which measure 175 ft. x 70 ft. and 70 ft. x 63 ft. respectively; a turntable 98 ft. diam. and two underground shelters.

(b) Diametrically across the turntable is a carriage surmounted by a framework which supports an aerial array. The latter is similar in many respects to the type used for transmitting a navigational beam on a frequency round about 30 mcs.

(c) An underground cable runs a distance of about 700 yards Eastward from what is probably a small transformer house at the station, whence it continues as an overhead line in a slightly changed direction to the main road between COURSET and COURSE.
